65	Student Marshals
66	University Officials
67	Commencement Officials and Staff

Congratulations on the completion of your degree! This milestone in your life should bring great satisfaction and pride to you, your family and friends. It is a big deal. I am confident that your appreciation of your Maryland experience will blossom more fully every year. You have learned the theories that underlie your field, and the ways to formulate and promote your ideas. You have also learned that asking the right question rather than getting the right answer is often the stepping-stone to knowledge.

The University of Maryland has offered you opportunities to develop your interests and expand your horizons. You have made friends and found mentors, and they too will add value to your life in ways that none of us can specify today, even though history makes us confident that it will happen.

As you leave us, I would like you to know how much we, the faculty and staff, respect your accomplishments as scholar, artist, athlete and leader—as individuals. You have enriched our lives and have helped the university reach new levels of distinction. We welcome you into the university's alumni family, a truly special group.

I urge you to stay connected to Maryland and take full advantage of the benefits of being an alumnus of the university. I hope that you will continue to support us and help new generations of students shape their futures as you have shaped yours. In this our 150th Anniversary year, please come back to campus for the many celebrations, especially on April 29th for Maryland Day 2006.

You have my very best wishes for all your endeavors. We are proud of each and every one of you! Stay in touch.

Yours sincerely,

C. D. Mote, Jr.

President

Congratulations, Graduates! Right now, you are probably more concerned with graduating, packing and preparing for life's next challenge than pondering an ongoing relationship with the University of Maryland.

But once your diploma is on the wall, your apartment security deposit has been restored and your IM buddy list is filled with new colleagues, I hope you will remember your alma mater.

As a member of our alumni family, you have Terrapin spirit that only comes from spending years on campus, learning and growing. The university can harness that spirit to build a brilliant future—a future you share now that Maryland appears on your resumé.

Alumni association membership is the No. 1 way for you to demonstrate your spirit and keep in touch with the university. It also allows you to retain the relationships and resources that you have enjoyed here.

The association is proud to offer you a complimentary one-year membership as a graduation gift. Once you activate it at www.alumni.umd.edu, your membership will:

- provide access to professional networking receptions and social programming
- allow you to take part in events at the Samuel Riggs IV Alumni Center
- give you the opportunity to support future generations of Terps

In addition, the association has partnered with car and health insurers, as well as loan-consolidation companies to help ease your transition into post-college life. Today, that transition is all consuming. But once it is complete, remember your university and stay connected.

Congratulations on your graduation and best of luck to you in your new role as Maryland alumni.

Sincerely,

Danita D. Nias '81

Executive Director, Alumni Relations

Dear Graduating Seniors,

While graduation is believed to be a time of ending, the term “commencement” actually means beginning. We are celebrating a new start in which we will more fully mature into the skills, talents, experiences and personalities we have developed in the past few years. It is a time to see from where we have come, admire who we are today and imagine our potential.

We are all focusing on our journeys in different ways, but we share a time period that others cannot fully comprehend as we do. We are witness to shared experiences on campus, in the local community and in the world around us. We have created a community upon which to depend in times of need and with whom to celebrate in times of excitement. Our strength revolves around our individuality and compassion.

Graduation is not a time to stop learning or sever this devotion to the University of Maryland, for it will always be our home. As much as these few years have helped us develop, our influence has made an indelible mark on this institution.

Congratulations graduates and best wishes!

The 2005-2006 Senior Council

A Continuing Commitment to Excellence

From its pre-Civil War roots as the state's first agricultural college and one of America's original land grant institutions, the University of Maryland has emerged as a public research university of national stature, highly regarded for its broad base of excellence in teaching and research. Maryland's beautiful 1,200-acre campus is in the heart of the I-270 research corridor that is fueling a burgeoning information technology and biotechnology industry.

The momentum of recent years has poised the university to take leadership in shaping the research university of the 21st century. By virtually every measure of quality, the University of Maryland has gained national recognition as one of the fastest rising comprehensive

research institutions in the country. Maryland is one of the nation's Top 20 public national universities, and the quality of our faculty is among the finest of any research university in the United States.

There are 13 schools and colleges within the organizational structure of the University of Maryland. Seven of these units—the Smith School of Business, the College of Education, the Clark School of Engineering, the Philip Merrill College of Journalism, the College of Computer, Mathematical and Physical Sciences, the College of Information Studies and the School of Public Policy—have been recognized by their peers and in various rankings as among the 25 best in the nation. The breadth of this excellence is a source of pride for students, faculty and staff, and is endorsement for the university's

flagship status among the state's institutions of higher education.

The university also continues to move forward in the quality of our students and the support of our faithful alumni. Freshman admission is increasingly competitive. Last year 22,468 applications were received for only 4,223 spots in the Fall 2005 entering class. Once accepted students complete their academic journey, they will join a rapidly increasing family of alumni who are proud to be called Terps. Maryland Alumni Association membership has grown to more than 30,000 dues paying members since its inception in 1989.

The university's commitment to quality education in a research environment is key to its academic reputation and the success of its graduates. More than 100 centers and institutes are engaged in research and outreach. The research enterprise infuses the curriculum at both the undergraduate and graduate levels, exposing students to the most pressing issues and challenges in their discipline and training them to respond with rigor as well as creativity to contemporary problems.

Faculty at the University of Maryland, in all fields of knowledge, are engaged at the highest levels of national and international concern. The university's location near the center of federal policy-making and international political and economic activity enables it to play an active role in research and

analysis of public policy. Strong links to the scientific and technological agencies and organizations of the federal government drive research in the environment, engineering, physics, computer science, life sciences and agriculture. Scholarship in the arts, humanities and social sciences is marked by the spirit of intellectual diversity and interdisciplinary collaboration.

Maryland is one of the research universities in the prestigious 61-member Association of American Universities and the only public institution in the Maryland-D.C. area with membership in the nation's most distinguished honor society, Phi Beta Kappa.

Total sponsored research and outreach revenue for fiscal year 2005 totaled more than \$329 million. These funds for research, training and outreach come from a variety of sources including the federal government, state government, corporations and foundations.

The Office of Technology Commercialization (OTC) at the University of Maryland was established in 1986 to facilitate the transfer of information, life and physical science inventions developed at the university to business and industry. In its 18-year history, OTC has recorded more than 1,500 technologies, secured more than 275 patents and licensed more than 750 technologies, generating more than \$23.5 million in technology transfer income. OTC collaborates with university offices

such as the Maryland Technology Enterprise Institute, the Technology Advancement Program, the Small Business Development Center and the Dingman Center for Entrepreneurship. These partnerships demonstrate the university's broad range of technology transfer services, R&D funding, partnering opportunities and entrepreneurial capabilities to the local community, industry and government.

History

The University of Maryland was founded in 1807 in Baltimore as a faculty-owned College of Medicine. The medical school was considered one of the top schools in the country, attracting notable professors and lecturers from throughout the world. In its beginning, tuition cost \$140, grades were sent home weekly to parents, and students could obtain room and board for \$300 annually.

Five years later, the growing institution was renamed the University of Maryland. Despite the name, the university was not considered a state institution as it was still owned and operated by faculty. Baltimore College of Dental Surgery, the first dental school in the world, became a part of the university in 1840, awarding the first Doctor of Dental Surgery (D.D.S.) degree in 1841.

In 1859, the Maryland Agricultural College, which would evolve into the University of Maryland, College Park, was opened under

The University Is On the Move

Leading the Way: Among Top 20 national public universities, Maryland is No. 1 in the total number of degrees conferred upon African American students.

New Homes for Innovation: We're building M Square, the University of Maryland Research Park, which will bring nearly 6,500 new jobs to the area. The state of Maryland also approved \$60.6 million in planning and construction funds, allowing us to break ground on a new Bioscience Research Building, bolstering the university's goal to provide regional leadership in education and research for the biosciences.

Our Constellation of Stars: The quality of Maryland faculty ranks among the finest of any research university in the United States and includes two Nobel Prize winners, six Pulitzer Prize winners and scores of Fulbright scholars.

Impact of Another Kind: NASA turned to the university to lead a \$279 million mission that gave astronomers a first look inside a comet, revealing the pristine materials that form the basis of our solar system. Deep Impact hit Comet Tempel 1 on July 4, 2005, providing valuable information for researchers.

Lighting a Path: The university is embarking on a new fundraising campaign that includes among its goals raising at least \$200 million for student scholarships, which are needed to ensure that lower- and middle-income students have the financial means to attain their degrees. Co-chairing this important effort is alumnus and men's head basketball coach Gary Williams and alumnus and national newswoman Connie Chung.

An Economic Force: The University of Maryland generates \$5.93 of economic activity for every dollar appropriated by the General Assembly, providing a statewide impact of nearly \$1.8 billion annually.

Lending Knowledge: With three million volumes and eight libraries on campus, the university's library system is the largest in the state.

Protecting our Communities: The Maryland Fire and Rescue Institute trained more than 31,500 sorely needed professionals during the last fiscal year.

a charter secured by a group of Maryland planters in 1856. In addition to spending one hour each day hoeing or plowing on the college farm, students took a broad range of courses in ancient and modern languages, natural sciences, English and mathematics. After a disastrous fire on campus in 1912, the state acquired the college and rebuilt it.

In 1920, the state legislature combined the College Park institution with the professional schools in Baltimore to form an expanded University of Maryland. The entity eventually grew to include campuses in Baltimore County, the Eastern Shore and University College, a continuing education institution.

The following decades saw the increasing growth of student population, excellence in programs and curricula, and the burgeoning of the University of Maryland, College Park, into a nationally recognized research institution.

July 1, 1988, marked the dawn of a new era in higher education in the state of Maryland, as the five components of the university were merged with six other state universities and colleges to form the University System of Maryland, and the University of Maryland, College Park, secured its flagship status with a mandate to become one of the pre-eminent research universities in the nation.

The Alumni Association

With alumni clubs from Miami to Taipei, Taiwan, the Maryland Alumni Association strives to keep and strengthen ties between the university and its graduates.

Member events such as pre-game parties, bull roasts, picnics, golf tournaments, dinner cruises and subscriptions to *Terp*, the University of Maryland magazine, help keep alumni connected to the university and to each other. All graduating seniors and successful master's and Ph.D. candidates receive a one-year free membership in the Maryland Alumni Association.

The Alumni

The Maryland Alumni Association's Hall of Fame honors university graduates who have brought honor to their alma mater through distinguished careers in a variety of disciplines. The following 35 individuals have shown the world what it means to be a Terp.

Carmen Balthrop '71

World-class Soprano

Michael Olmert '80 Ph.D.

Emmy Award-winning Writer

Robert H. Smith '50

Developer of Crystal City

Gary Williams '68

Championship-winning Coach

Morgan Wootten '56

Basketball Hall of Fame Member

Customs of Commencement

Early commencement ceremonies at the University of Maryland were marked with great fanfare and celebration. The faculty gave huge banquets for the graduates the night before the event. The

following morning, crowds gathered to watch the young graduates parade. It was a gala social occasion, attracting not only friends and relatives, but the fashionable elite of the day. At the ceremony, prayers were recited, speeches were made, and honorary degrees were awarded to distinguished figures from across the country. Finally, as the audience cheered and threw flowers, the graduates came forward to collect their Latin-inscribed degrees.

Academic Costume

The black caps and gowns worn by the students and faculty in the academic procession have been the traditional costume of scholars since the Middle Ages. The ordinary dress of the scholar, whether student or teacher, was similar to that of a cleric. Caps and gowns were probably worn to keep students warm in unheated buildings. Many medieval scholars were tonsured, like monks, and hoods served to cover their shaved heads until the skullcap later took its place.

Even after the Civil War, most students at American universities wore caps and gowns daily while in residence. These varied in design until they were standardized by the American Intercollegiate Commission in 1894. At that time it was decided that all robes would be black. Colors on the trim of the gown were also standardized to indicate the scholar's academic discipline.

A list of department colors follows:

Agriculture: Maize

Arts, Letters, Humanities: White

Business Administration,

Commercial Science: Drab

Dentistry: Lilac

Economics: Copper

Education: Light Blue

Engineering: Orange

Fine Arts, Architecture: Brown

Forestry: Russet

Home Economics: Maroon

Journalism: Crimson

Law: Purple

Library Science: Lemon

Medicine: Green

Music: Pink

Nursing: Apricot

Oratory, Speech: Silver Gray

Pharmacy: Olive

Physical Education: Sage Green

Philanthropy: Rose

Philosophy: Dark Blue

Public Administration, Foreign

Service: Peacock Blue

Public Health: Salmon

Science: Golden Yellow

Social Work: Citron

Theology and Divinity: Scarlet

Veterinary Sciences: Gray

The tassel may also be colored to represent an academic discipline or it may be black. Officially, the tassel is permitted "to lie where it will" on the mortarboard. However, numerous institutions have adopted the practice of having degree candidates wear the tassel on the right front side at the start of the commencement ceremony and then shift them to the left side after degrees are awarded.

Student Marshals

Elected through a nomination process, student marshals are senior leaders who play an important role in the graduation ceremony. Student marshals assist in organizing the thousands of graduates, leading them smoothly through the commencement procession. They also supply extra caps and hoods, and bobby pins to keep headwear secure. December 2005 marshals are listed on page 65 of this booklet.

Senior Gift

Since 1910, members of the graduating class have supported a senior gift designed to commemorate their college experience. Traditionally the gift serves as a contribution to the campus community that forever links alumni with the university. Past gifts include the Testudo statue, gardens, artwork, contributions to the library and support for projects such as the Jim Henson statue and the sundial.

The M circle is a Maryland icon. It's probably one of the things remembered most about campus upon graduation. The Class of 2005 has the chance to leave its mark on campus by placing a similar landmark near Lot F and the Samuel Riggs IV Alumni Center—one that will inspire students, impress visiting football teams and become a symbol for alumni.

This year, the Senior Council has arranged to landscape that circle for the 2005-2006 Senior Class Gift.

This gift will welcome past, current and future Terps onto campus while putting your mark on the university in a "roundabout" way.

To be a part of this 95-year tradition of philanthropy by donating to the Senior Class Gift, visit www.seniors.umd.edu or call 301.314.GRAD for more information.

Academic Degrees

A degree is awarded for the successful completion of a course of study. There are more than 1,600 different academic degrees currently conferred by colleges and universities nationwide. The University of Maryland offers degrees in 90 undergraduate majors, 97 master's programs, 73 doctoral programs and one first professional degree.

The Doctor's Degree

The doctor's degree represents the most advanced earned degree conferred by American institutions. There are two distinct types: the practitioner's degree and the research degree. The first type represents advanced training for the practice of various professions, principally Doctor of Medicine, Juris Doctor, Doctor of Pharmacy, and Doctor of Veterinary Medicine. These degrees do not involve the completion of original research by the student. The University of Maryland, at the professional school in Baltimore, awarded the first two dental degrees ever on

March 9, 1841, and invented the name of the degree, Doctor of Dental Surgery (D.D.S.).

The University of Maryland conveys the Doctor of Veterinary Medicine (D.V.M.) to approximately 90 students each year in a program that was instituted in 1980. Graduates receive a diploma containing the seals of both the University of Maryland and its partner institution, the Virginia Polytechnic Institute and State University.

The second type is the research doctorate representing prolonged periods of advanced study. A dissertation that usually accompanies the study is intended to contribute substantially to the body of knowledge on the subject. The most important of these, the Doctor of Philosophy, no longer has an implication of philosophy for its holder, but represents advanced research in any of the major fields of knowledge. It was first awarded in the United States in 1861 by Yale University. The University of Maryland awarded a Ph.D. for the first time in 1920.

The Master's Degree

The master's degree is an academic honor bestowed upon students who have successfully completed work beyond the baccalaureate.

A thesis and an oral examination are usually required. In 1920, the University of Maryland awarded its first Master of Arts (M.A.) and Master of Science (M.S.) degrees in fields other than agriculture.

The Bachelor's Degree

The bachelor's degree represents the completion of a four-year course of college-level study and is the oldest academic degree awarded by American institutions of higher learning. It was first conferred in America in 1642 on

the first nine graduates of Harvard College. Maryland Agricultural College, which later became the University of Maryland, College Park, awarded its first Bachelor of Arts (B.A.) and Bachelor of Science (B.S.) in 1862.

Students and parents awarded him for being an outstanding faculty member. Students also chose him for an honor from Kappa Delta Pi, an international education honor society. For John Splaine, the rewards of being an educator really come from being around those who want to learn and “encouraging them to explore their interests.”

An associate professor emeritus in the College of Education and recently retired Amos B. Hostetter, Jr., chair at the University of Denver where he taught courses in political communication, Splaine began his teaching career as a high school history teacher in New Hampshire. He directed the University of New Hampshire’s Upward Bound program for low-income college students from 1970 to 1973. He then came to the university, where he taught full time until 2001. He still teaches foundations of education courses part-time.

He believes that involving students in their learning enriches the process. “I try to challenge students to think for themselves. However, I believe that they need knowledge in order to think critically about what they read, hear and see,” he says.

He took this concept to Croatia and Yugoslavia a few years ago. Working through Croatia’s Solidarity Center and then in Montenegro, Splaine used his experience on political campaigns to teach courses in media literacy for teachers used to government propaganda. Splaine says that being even a small part of the region’s “peaceful revolution was a great adventure. One of the highlights of my life.”

Another highlight was being named a Philip Merrill Presidential Scholars Program Faculty Mentor in 2000. The program honors the university’s most successful seniors and their designated university faculty and K-12 teachers for their mentorship.

Splaine earned his bachelor’s and master’s degrees in American history from the University of New Hampshire, and a doctorate in education from Boston University. His 1994 book, *A Companion to the Lincoln-Douglas Debates*, was published to accompany C-SPAN’s televised reenactments of the 1858 events. A companion CD-ROM, “A House Divided: The Lincoln-Douglas Debates,” received the Gold Apple award from the National Educational Media Network. He’s been an education consultant for the network for 18 years, including work on its Peabody Award-winning series “American Presidents: Life Portraits.”

John Splaine

Samy Bassam Muaddi

As part of a class that has seen September 11's horror, the war in Iraq and Hurricane Katrina's devastation, Samy Bassam Muaddi believes more than ever in the interconnectedness of humanity. His actions support this belief, as he has spent considerable time on community-building efforts locally, nationally and internationally.

While earning academic honors every semester as an economics major, Samy found time to not just get involved with, but to create a few university groups. His most significant endeavor attests to his commitment to the idea of unity. Two years ago, amidst campus tensions between Jewish and Arab students, he co-founded The Common Grounds Project. A collaborative effort between the Jewish Leadership Council and the Organization of Arab Students, it asks Palestinian Americans and Israeli Americans "to come together to explore what common ground we have to stand on. It is a process of eliminating existing layers of mistrust and building in their place genuine understanding of our commonalities and their limits," says the College Park Scholar, who received a citation in Business, Society and the Economy last year.

This past summer, Samy, a first-generation Arab American, interned with Beit Sahour municipality in the Palestinian territory of the West Bank, writing successful grant proposals for humanitarian aid and development projects. "I gained a greater appreciation for my family and why my parents raised me the way they did," he says of the experience.

He has earned high praise from Shibley Telhami, Anwar Sadat Professor for Peace and Development, who taught Samy in an International Relations and World Politics course. "He was the only student to earn an A+, which is unusual in my classes," says Telhami. "He struck me as an intelligent and thoughtful young man who deserves to be recognized."

Through all this, Samy still found time to play. He co-founded Terp Runners, participating in several marathons, and a Debkeh troupe that performs traditional Arabic folklore dance on and off campus.

His future goals include working on economic development in Middle Eastern and sub-Saharan Africa, and convincing his parents to write their autobiographies.

The December 2005 class roster comprises degree candidates from the graduate and undergraduate programs at the University of Maryland, College Park. As final action cannot always be taken for candidates by the time this program is printed, the list of candidates here is tentative only. The university reserves the right to withdraw or add names. Diplomas (for other than doctoral degrees) will be mailed by the Office of Records and Registration.

Bachelor's degree candidates who have qualified for scholarship honors upon graduation are designated by appropriate symbols adjacent to their names within the alphabetical listing of colleges or schools, pages 27–32 and 47–60.

To be eligible for consideration for such honors a candidate must meet the following general criteria: (1) have completed at least two years of work at the University of Maryland (60 semester hours, 30 of which were earned at the College Park campus) and (2) have a scholastic average of a “B” (grade point average of 3.0) or higher in the University of Maryland work prior to the last semester of registration before the awarding of a degree.

Degree candidates who have met these criteria are shown in the listings as qualifying, upon graduation, for the designators *Summa cum Laude* (if they ranked in the top 2 percent of the candidates in their respective colleges or schools), *Magna cum Laude* (if in the next 3 percent), or *cum Laude* (if in the next 5 percent) based on the grade point averages of students in the preceding three graduating classes of their degree-granting unit.

University Honors Citations

Students who have earned the University Honors Citation may wear red and gold braided cords over their academic gowns.

The Senior Marshal Program began 1991 as an opportunity to acknowledge outstanding seniors at their commencement. The students selected to be marshals were nominated by faculty, administration and staff for their outstanding accomplishments and contributions to the University of Maryland. We are proud to recognize these truly remarkable students.
